

EUROPEAN ECONOMIC DEVELOPMENT COUNCIL (EEDC)

E. E. D. C.

SOUTHEAST ASIA AND PACIFIC

E E D C

EUROPEAN ECONOMIC DEVELOPMENT COUNCIL

WELCOME WITH PLEASURE
HE ENRIQUE AGUIRREZABALA
HE PHURIKASEM SUPATTANANON

Kingdom of Thailand
South East Asia and Pacific

GLOBAL PRESIDENT AND CEO

HE Enrique AGUIRREZABALA

On the subject of South East Asia

Please be kind to send my personal regards to our President for the Kingdom of Thailand, that was wisely suggested his appointment by your good knowledge and experience, for which we deeply thank you. Indeed we are going to start immediately our actions in South East Asia, in energy, transport helicopters, telecommunications, agriculture, gold mining and banking.

In LAOS,

If they can really do it this is by fair one of the best options, because through your extraordinary dedication and knowledge, you have opened a very strong and important relation.

THAILAND

Whit no doubt is an extraordinary country with extraordinary people. When we open our new office in Bangkok. I will be eager to build or find a house for my self, so I can spend more time in this wonderful country.

I remember the project we discuss about the train to connect Myanmar, Thailand, Lao, Cambodia and Vietnam. This is an incredible and absolutely needed project. we can finance this project, we will have the full support of the Thai country, bringing benefit and future development for the Thai Nation and People. Especially on the IATN Project. Whit no doubt is an extraordinary country with people and this country that has all my love and respect.

In a process of transition, and as well in a moment of important needs to build roads, and train communications, to efficiently connect South East Asia.

I remember the project we discuss about the train to connect Myanmar, Thailand, Lao, Cambodia and Vietnam. This is the type of project in which we have to focus, and involve large personalities and decision makers, as consequence of that involvement they will work to get the guarantees, and we will work to put the money for those projects against the guarantees. This is the way to do it: If we move forward with the train project, we have different type of trains:

HE Enrique AGUIRREZABALA

GLOBAL PRESIDENT and CEO

**EUROPEAN ECONOMIC DEVELOPMENT COUNCIL
(EEDC)**

We can call the project International Asian Train Network (IATN). We can connect Rangoon, Vientiane, Bangkok, Phnom Penh and Vietnam, in that way we will have two lines, one from South to north and one from West to east (from Rangoon to the golf of Tonkin)

In the South we will connect, Bangkok, Phnom Penh and Ho Chi Minh. And in the North Vientiane and Ha-Noi, and of course Rangoon will be connect to South and North, so we will transport goods from the Sea of Andaman and the Gulf of Bengali to the Sea of China and the Gulf of Tonkin, reducing the transport distance in 2000 km.

This is an incredible and absolutely needed project. we can finance this project, we will have the full support of the Thai country, bringing benefit and future development for the Thai Nation and People.

I will gladly waiting for your comments, specially on the IATN Project.

As always, my dear and most respected President, please be kind to receive my best regards.

For me this is one of the most important areas of the world today and it is compulsory
to start everything.

EEDC & JERDCHAMRUS INTERNATIONAL GROUP

Technological advances in the globalization era cause dissolve the natural resources. To bring the human resources are limited. Used to generate energy for use in living, such as natural gas, coal, mineral oil that will reduce the days turn into little more. And also cause the number of consequence are trying to substitute research for new academics engineering professionals. Scientists, Biological, Chemists and other experts. Conducted research studies and trials.

EEDC & JERDCHAMRUS International Group.

to be allocated to Country Economic Development and Reconstruction Projects with Emphasis on Food Security Production, Energy, Health Care, Hospital, Low Cost Housing, Multi-National Centers, Infrastructures and Ecology Conservative and Protection. The Projects shall be jointly managed by

“Global Food Security & Reserve Group”

To innovate and renewable energy is no odor, no smoke, no pollution is the best of economics. Culmination of renewable energy and the discovery of the top. Available on today's world, human action human resource development. Another way is part of the economics of renewable energy. Survival of humankind is the cause and the main structure in developing countries to step into a basic social security and family support to a situation which caused the material prosperity. Factor is an indication of being well enough along **with His Majesty The King Rama Current reign about sufficiency economy, existence in society honorably. They are the indicators to measure progress conditions of well-being of people in the country also.**

Therefore, to be a guideline in establishing country development and to support government's policy relating to the global warming reduction strategy and to create green technology and energy innovation which currently is the most advanced in the world **“To heal the nature of our World”** and to reduce pollution that has already been causing the loses of all living creatures' lives

DEVELOPMENT

PREPARATION OF OTHER PROJECTS WHICH ACCORDING TO THE POLICY OF GLOBAL PRESIDENT THAT WILL BE IMPLEMENTED IN 2021-2030

1. Projects in China and HKSAR

Looking at the global geopolitical structure and realistic responsibilities, we propose to use this project fund to focus on the future development plans of cutting-edge science and on China's Future Emerging Industry and Regional Economic Development. The fund will be divided into eight major investment areas with 36 major categories of projects with different engineering and industrial cluster projects to be carried out in different regions. It is estimated that all the proposed projects will be completed and put into operation in ten years (2020-2029). Six pillar industrial clusters will form the core of the future world economy:

- ❖ Ecological Restoration and Resource Rejuvenation Industrial Cluster;
- ❖ Agriculture Innovation and Health Food Industrial Cluster;
- ❖ Biomedical and Life Science Industrial Cluster;
- ❖ Ultra-micro Materials and New Energy Industry Cluster;
- ❖ Intelligent Device and Information Industry Cluster;
- ❖ AI-based Fintech and Blockchain Technology Industry Cluster.

As a commitment to the mission, UAB and its subsidiaries, together with various government entities, jointly have taken the initiative to engage in a long-term business commitment to promote economic development and improve the lives and well-being of people in China and Lancang-Mekong River Basin, by implementing the strategic projects they have laid out and are part of the government's directions.

Taking advantage of the tropical resources from these regions, the plan is aimed to stimulate and promote rapid economic growth and make an important contribution to the development of emerging industries and economic development through the following initiatives in eight major investment areas:

UAB Global Limited ("UAB") for China's Future Emerging Industry and Regional Economic Development Investment Plan of People's Republic of China, Hong Kong SAR and Lancang-Mekong River Basin.

- Agriculture, Rural Revitalization and Healthy Food Industrial Cluster
- Global University Traditional Chinese Medicine
- Lancang-Mekong River Basin
- National Public Health
- Free Trade Port Innovative Economic Industry Cluster in Hainan
- Ecological Restoration and Environmental Governance
- New Energy, Resource Utilization and Industrial Revitalization
- Advanced Scientific Research and Innovation Greater Bay Area

The proposed investment is based on the international objectives stated to bring much needed social and economic development to China, particularly Southcentral and Southwest China with Lancang-

PREPARATION OF OTHER PROJECTS WHICH ACCORDING TO THE POLICY OF GLOBAL PRESIDENT THAT WILL BE IMPLEMENTED IN 2021-2030

-Mekong River Basin. The socio- economic transformation will improve and increase the per capita income and ensure that prosperity is fairly shared amongst the society with highly quality education and healthcare, access to information, knowledge, science and technology. Governance of the rural ecological environment, utilization and management of the natural resources and living environment and solving the shortcomings in the infrastructure will support the economic growth and regional development.

2. Project in Thailand

- ❖ Site preparation for the Bangkok office of EEDC in Thailand.
- ❖ MRO INDUSTRIES PARK Maintenance Repair Aviation Service Project.
- ❖ Expressway Project
- ❖ Special Economic Zone and Industrial Zone And Logistics : Thailand has announced 10 Special Economic Zones
- ❖ IATN (International Asian Train Network) and High-speed train.
- ❖ Norwich International School Bangkok and Norwich International University
- ❖ Light Chance of Your (Opportunities for housing for Thai people and creating jobs)
- ❖ Thai Pure Coconut world : Comprehensive coconut product research center : Thai organic agriculture research and development institute
- ❖ Priest Hospital
- ❖ EEDC S/E Asia's Financial Institutes for Human Development Project : Headquarters is in Bangkok, branches in several cities.
- ❖ Private wharf project to support Laem-Chabang deep sea port
- ❖ Songkhla Lagoon City Estate Development Project
- ❖ EEDC ASEAN's Chains of Education, Medical & Cultural Centers Project
- ❖ Thailand's High-Speed Train System Project

3. Project in Malaysia

- ❖ Leader in Green Mobility and advanced propulsion drive technology
- ❖ EEDC ASEAN's Chains of Education, Medical & Cultural Centers Project
- ❖ High-speed train
- ❖ Land and House for The residential home for Commissioner
- ❖ NEW Industry Zone
- ❖ EEDC S/E Asia's Financial Institutes for Human Development Project

4. Project in Cambodia

- EEDC Green Mountain Resort (Green Mountain Resort Siem Reap province Cambodia)
- Angkor's Agricultural Production & Development Project
- Gold mining / minerals other.

PREPARATION OF OTHER PROJECTS WHICH ACCORDING TO THE POLICY OF GLOBAL PRESIDENT THAT WILL BE IMPLEMENTED IN 2021-2030

- Program rehabilitation economic and social family organization (PRESFO)
- General project of (LST) Company
- Expressway / Road
- High-speed train
- Heng Meng Hok University
- ASEAN's Chains of Education, Medical & Cultural Centers Project
- KIM CHANNOL The construction of house building
- Green Energy
- Transport helicopters
- Telecommunications
- S/E Asia's Financial Institutes for Human Development Project : Headquarters is in Phnom Penh, branches in several cities.
- Electrical energy
- Projects in industry, Agriculture, global food reserves.

5. Project in Lao PDR.

- ❖ EEDC S/E Asia's Financial Institutes for Human Development Project : Headquarters is in Vientiane, branches in several cities.
- ❖ Gold mining / other minerals
- ❖ Hospitals : 17 provinces ; 150 districts in nation wide (These hospitals will be new construction)
- ❖ Roads : Feasibility study for No. 13 new road from Vientiane to Champasak province : New roads in Lao PDR
- ❖ Schools : district and village in rural (These schools will be new construction)
- ❖ Infrastructure : Water system : Electricity system : Internet system : Sanitary system
- ❖ Airport
- ❖ Special Economic Zone
- ❖ Motorway
- ❖ Electrical energy
- ❖ High-speed train
- ❖ Projects in industry, agriculture, global food reserves.
- ❖ Gold mining / other minerals

6. projects in Vietnam

- EEDC ASEAN's Chains of Education, Medical & Cultural Centers Project
- EEDC S/E Asia's Financial Institutes for Human Development Project : Headquarters is in Hanoi, branches in several cities.

PREPARATION OF OTHER PROJECTS WHICH ACCORDING TO THE POLICY OF GLOBAL PRESIDENT THAT WILL BE IMPLEMENTED IN 2021-2030

- 40 key Social, Science and Technology Institutes Science-Techno 60
- Research and Produce of Special Semiconductor Materials
- Semiconductor ICs from Special Materials
- Research and Produce of nature compounds by Nano Technology
- Artificial Intelligence
- Supercomputer
- Big Data
- Internet of Things
- 3D printing technology
- Networks 5G, 6G
- Cloud computing
- Robotics Technology
- Popularizing English
- Foundation Competency
- Popularizing classical music and painting
- Support and upgrade universities and colleges
- High-tech City
- Learning City
- Health care by combining East-West medical
- Food made from insects
- Organic Fertilizer
- Organic foods and macrobiotic diets
- Plant varieties
- Aquaculture (fresh and brackish water)
- Centers of Commerce - Culture in the world
- New Industrial Park
- Specialized cultivation area
- Happy Farm
- Renewable energy (hydraulics, solar, wind)
- Ocean Farming
- Regional Development
- Mineral refining and scrap recycling
- Disposal of household waste
- Housing + school for disadvantaged children
- Nursing homes for the elderly
- Bank to support Technology and Education
- Fund to support Farmers in applying high-tech

PREPARATION OF OTHER PROJECTS WHICH ACCORDING TO THE POLICY OF GLOBAL PRESIDENT THAT WILL BE IMPLEMENTED IN 2021-2030

- Fund to support Startups and Innovation
- Health insurance fund for low-income people
- Infrastructure works: Bridges, Roads, Culvers
- Rehabilitation of rivers, lakes and sea dykes
- National wide clean water supply
- Drainage and wastewater treatment
- Maintenance and development of nature reserves
- Restoration of Historical Sites
- Forestation and forest protection
- Social housing
- Raw materials for the steel, garment, and leather industries
- Improving national labor productivity
- Upgrading urban traffic infrastructure
- Upgrading river port and seaport systems
- High Speed Railway
- Reducing pollution due to industry and life
- Theme Park
- Producing leather from fungi to replace animal skin
- New school system
- Supporting foreign high-tech investment

7. Project in Myanmar

- Hospital project in Myanmar (AUNG HOSPITAL PROJECT).
- The high-speed trains
- Power & Energy Project
- Gold mining / minerals other
- Investment for building Industrial Zone
- Electrical energy
- Projects in industry, Agriculture, global food reserves.
- EEDC S/E Asia's Financial Institutes for Human Development Project : Headquarters is in Yangon, branches in several cities.
- EEDC ASEAN's Chains of Education, Medical & Cultural Centers Project

PREPARATION OF OTHER PROJECTS WHICH ACCORDING TO THE POLICY OF GLOBAL PRESIDENT THAT WILL BE IMPLEMENTED IN 2021-2030

8. Project in Philippines

- ❖ EEDC S/E Asia's Financial Institutes for Human Development Project : Headquarters is in Manila, branches in several cities.
- ❖ EEDC ASEAN's Chains of Education, Medical & Cultural Centers Project

9. Project in Indonesia

- ❑ EEDC S/E Asia's Financial Institutes for Human Development Project : Headquarters is in Surabaya, branches in several cities.
- ❑ EEDC ASEAN's Chains of Education, Medical & Cultural Centers Project
- ❑ PAPUA Project Indonesia
